

## DEPARTMENT OF LABOR

### **Agency Information Collection Activities; Submission for OMB Review; Comment Request; Occupational Noise Exposure**

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** The Department of Labor (DOL) is submitting this Mine Safety and Health Administration (MSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

**DATES:** The OMB will consider all written comments that agency receives on or before **[INSERT DATE 30 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER]**.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](https://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review - Open for Public Comments" or by using the search function.

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** Crystal Rennie by telephone at 202-693-0456 or by email at DOL\_PRA\_PUBLIC@dol.gov.

**SUPPLEMENTARY INFORMATION:** Noise is a harmful physical agent and one of the most pervasive health hazards in mining. Repeated exposure to high levels of sound over time causes occupational noise-induced hearing loss (NIHL). NIHL is a serious, often profound physical impairment for miners, with far-reaching psychological and social effects. NIHL can be distinguished from aging and other factors that can contribute to hearing loss and it can be prevented. According to the National Institute for Occupational Safety and Health (NIOSH), NIHL is among the "top ten" leading occupational illnesses and injuries.

For many years, NIHL was regarded as an inevitable consequence of working in a mine. Mining, an intensely mechanized industry, relies on drills, crushers, compressors, conveyors, trucks, loaders, and other heavy-duty equipment for the excavation, haulage, and processing of material. This equipment creates high sound levels, exposing machine operators as well as miners working nearby to occupational noise that can contribute to hearing loss. MSHA, the Occupational Safety and Health Administration, the military, and other organizations around the world have established and enforced standards to reduce the loss of hearing. Quieter equipment, isolation of workers from noise sources, and limiting the time workers are exposed to noise are among the many well-accepted methods that will prevent NIHL.

Records of miners' exposures to noise are necessary so that mine operators and MSHA can evaluate the need for and effectiveness of engineering controls, administrative controls, and personal protective equipment to protect miners from harmful levels of noise that can result in hearing loss. However, the Agency believes that extensive records for this purpose are not needed. Instead, the requirements are a performance-oriented approach to monitoring. Records of miners' hearing examinations enable mine

operators and MSHA to ensure that the controls are effective in preventing NIHL for individual miners. Records of training are needed to confirm that miners receive the information they need to become active participants in hearing conservation efforts. For additional substantive information about this ICR, see the related notice published in the *Federal Register* on May 10, 2021 (86 FR 24897).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

*Agency:* DOL-MSHA.

*Title of Collection:* Occupational Noise Exposure.

*OMB Control Number:* 1219-0147.

*Affected Public:* Private Sector: Businesses or other for-profits.

*Total Estimated Number of Respondents:* 12,929.

*Total Estimated Number of Responses:* 190,001.

*Total Estimated Annual Time Burden:* 14,153 hours.

*Total Estimated Annual Other Costs Burden:* \$30,585.

(Authority: 44 U.S.C. 3507(a)(1)(D)).

**Crystal Rennie,**

*Senior PRA Analyst.*
